Situation Report: Earthquake Disaster May 2 & 3, 2015

After a week of disastrous earthquake, people are still waiting for food and shelter; most of them are from remote hard-to-reach areas. Humanitarian reliefs are still beyond the reach especially in remote villages of Kavre, Sindhupalchok and Nuwakot districts where the earthquake hit the most. It is said that in Sindhupalchok only, the casualties might reach about 5,000. In this area, even after 9 days of earthquake, 2 men and 1 woman are rescued.

- Rotary Club of Butwal supported with tent, mat and food to Baireni Village-4.
- President of Kavre Chamber of Commerce and Industry visit affected villages and planning further with Nepal police district chief.
- ICA Nepal and Rotary Rudramati delivery food and logistics at Kallerai, Gagan Pani.
- Two tourists visiting Nepal brought blankets and distributed.
- Salute to Nepal Army, Police, doctors, electricians, oil pump workers. They all are doing great job to help the victims.
- Nepal Jaycees team and Computer Association of Nepal team distributing food relief.
- Dr. Rajendra Koju of Dhulikhel Hospital working tirelessly.
- Nepal Army and overseas helicopter mobilising in rescue operation. Everyone is doing great job.
- Banepa Leo Club and Rotaract Club of Kavre Banepa providing food and tent in villages of Kavre and Sindhupalchok.
- Rotary Madhyapur offering food feeding for 1000 people.
- Rotary Club of Dang deployed 4 medical team to Gorkha.
- Rotary Club of Dhangadhi send medical team to Gorkha.
- Rotary Club of Baglung providing relief materials in earthquake affected area in Baglung.
- Rotary club of Mahaboudha distributed food and tent in Sindhupalchok.

Activities by Rotaract Club of Dhulikhel

- Earthquake relief materials distribution at Chapabot, Baluwa, Panchkhal in collaboration with Aid for Nepal. The relief package was specially focused for lactating women of this village. Around 64 packages among 178 families were distributed. Package consists of rice, cooking oil, salt, biscuits, warm clothes and tent.

- Visiting, Inspection and data collection from earthquake disaster hit villages around Panauti Municipality such as Katunje Village, Kushadevi Village.
- Volunteering in Dhulikhel Community Hospital.

Activities by RC Madhyapur

- Health camp and medicine (Taiwanese medication)
- Distribution of mineral water

Activities by Rotaract Madhyapur

- Camp in KMC Hospital - Panga
- Medicine and water distribution

Activities by RC Kavre Banepa/Rotaract Kavre Banepa

- Medicine supplies and food distribution in Bhimtar Village.

Activities by KU Beta Volunteering Team

- Helping people to bring rice, potato, clothes from the destroyed house in Kavre Village.
- Distribution of soap, toothpaste, toothbrush in Bhaktapur

GCF - CDRA -Rotary-Mercy Relief- The Johanniter,Germany Meeting

Discussed how to reach quick and response to sanitation and rehabilitation plan.

Response for Disaster

In response to the disaster, Rotary District 3292 Nepal-Bhutan, Rotary Club of Dhulikhel coordinating with GCF-USA/CDRA Nepal, District Disaster Relief Committee-Kavre district is implementing Earthquake disaster response with basic food survival package including.

1. Rice 7 Kg,	2. Masala 3 pkts
3. Lintel 1Kg	4. Steel plate 5 pcs
5. Food grain 1 kg	6. Spoon 5 pcs
7. Salt 1 pkt	8. Plastic jug 1 pc
9. Cooking oil 1 ltr	10. Plastic bucket 1 pc
11. Beaten rice 1 Kg	12. Noodles 1 pkt
13. Plastic Sheet 8x20 ft	14. Nylon Rope

Total package cost Rs. 2,200/- now we are providing 1000 set of above mentioned items to be delivered to the victims affected by recent earthquake. Rotary Club of Dhulikhel/ CDRA Nepal team is working hard to response the situation. We believe that this will support 5 members

family to survive 7 days. Rotary is coordinating many international Rotary clubs to support the people in need.

We thank you very much for generous support to our GCF friends and Rotary friends worldwide for your cooperation on the difficult situation. We also thank Rotaract Club of Dhulikhel, Budol, KU, Rotary Community Corps.

Preparing more food package and looking for more tents to buy in Nepal markets. There is scarcity to find the goods and supplies. However, we are working with neighboring Rotary and Lions network to get things in place. Rotary and Lions club from India are also helping with deliveries. Mercy Relief, Singapore is also providing 1000 sets of food and tents next week.

What we did today (May 2 & 3, 2015)?

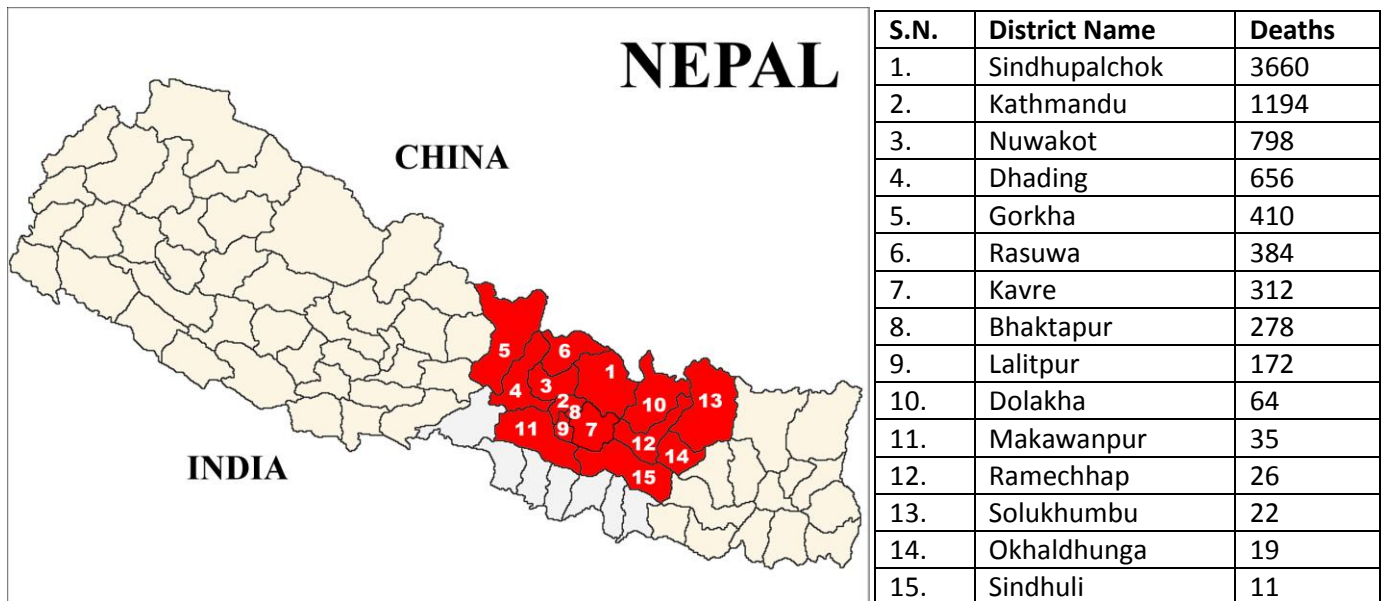

- ✓ Packaging of more than 500 sets of relief pack.
- ✓ Packaging of 21 sets of relief pack for Kadhambash, Aarubot village
- ✓ Packaging of 50 sets of relief pack for Jogitar village, Panchkhal
- ✓ Packaging of 30 sets of relief pack handed over to Rotary Club for Kathmandu.
- ✓ Packaging of 30 sets of relief pack handed over to RC Nagarjuna

Map 1: Major 15 earthquake affected districts

Casualties in Nepal (Till May 3rd):

Total toll: 7,276 Injured: 14,267

415 million still waiting for basic relief materials

Our Future Rehabilitation Plans:

To build more than 1000 Low cost houses made by Earth bag. We are preparing one sample house near by our office.

Complete Building Cost: *Rs 1, 56,000 Approximate USD 1,560*

What is Earth bag?

For those who don't know, earth bag building uses polypropylene rice bags or feed bags filled with soil or insulation that are stacked like masonry and tamped flat. Barbed wire between courses keeps bags from slipping and adds tensile strength. The final plastered walls look just like adobe structures. After devastated earthquake in Nepal it is the proper and efficient design for quick and emergency shelters for those who loss there home. (www.instructables.com)

Why Earthbag System Building?

- The ease and simplicity of building with earthbags should also be mentioned, since there is much unskilled labor available around the world that can be tapped for using this technology.
- One person familiar with the basics can easily train others to assist in the erection of a building.
- This not only makes the process more affordable, but also more feasible in remote areas where many common building skills are not to be found. (www.instructables.com)

Tools and materials needed (listed left to right):

Woven polypropylene bags (about 18" x 30"), bucket chute (4-gallon bucket with bottom cut off), 4 or 5 heavy duty 2-gallon cement buckets, string line, metal chisel and scrap steel for cutting barbed wire (or bolt cutters), hammer, sheet metal slider (about 13" x 16"), 15 gauge galvanized wire, knife, wire cutters, tape measure, 4-point barbed wire, corner guide, grub hoe or grape hoe, level, tampers, bundle 500 bags, shovel.

See some photos of earthquake hits and distribution of relief materials, 2nd & 3rd May
